

Chrome metal Airmelt Grade

Airmelt grade chrome metal is used for production of special steels and superalloys, for a great variety of industries as diverse as aerospace, oil & gas exploration and production, industrial gas turbines, automotive, chemical and nuclear. It is also used for hardfacing, aluminium and copper alloys.

01 Standard Specifications

	Al	Fe	Si	O	N	C	S	P	Cr
Max (ppm)	1500	3000	1500	1700	250	200	150	20	Min (%) 99,4%
Typical (ppm)	1000	2000	1000	1300	150	150	80	10	

Other specifications are available upon request

02 Size

Lumps 2" by down (0-50 mm), or according to specifications

03 Packing

Steel drums 500 lb / 250 kg

1 MT big-bags

Customs tariff 81122190
REACH registration no. 01-2119485652-31-0039
